Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 11-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese patent document 2-283306.

Japanese patent document 2-283306 teaches the concealed slide fastener as claimed including continuous fastener element row composed of a synthetic resin monofilament is knitted or woven into a fastener element attaching portion of a knitted/woven fastener tape constituted of a warp knitting structure or a weaving structure at the same time when the fastener tape is knitted or woven, the knitted/woven fastener tape comprising a tape main body and the fastener element attaching portion, with each coupling head of the continuous fastener element row directed toward the fastener tape main body, the knitted/woven concealed type slide fastener characterized by comprising: multiple fixing yarns which are knitted or woven into the fastener element attaching portion and which fix each element of the continuous fastener element row onto the fastener element attaching portion. Japanese patent document 2-283306 does not set forth the specific dimensions set forth in the claim. It would have been obvious at the time the invention was made to provide the specific dimensions as claimed since such a modification would have involved a mere change in the size of a component. A change in size is

generally recognized as being within the level of ordinary skill in the art. *In re Rose*, 105 USPQ 237 (CCPA 1955).

Allowable Subject Matter

Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
